MSDS

A Permanent Solution

IMPORTANT NOTE:

Glycerin, Alcohol and Water are ingredients in all our pigment formulas. Those specs can be found on our site at www.apermanentsolution.com , in separate documents.

Material Safety Data Sheet

Pigment Ink

TN-3

Brown Velvet

1. Product and Company Identification

Product Name: Pigment Ink
Product Code: TN-3
Company: A Permanent Solution
1038 E. Bastanchury Road #186
Fullerton, CA 92835 USA
www.apermanentsolution.com E-mail: info@apermanentsolution.com
Phone: (714) 441-1900 Fax: (714) 441-1808

2. Hazards Identification

Physical State: Solid.
OSHA/HCS status: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Emergency Overview: No specific hazard.
MAY CAUSE EYES AND SKIN IRRITATION. CANCER HAZARD-CONTAINS MATERIAL WHICH CAN CAUSE CANCER.
Slightly irritating to the eyes and skin. Avoid exposure-obtain special instructions before use. Avoid contact with eyes. Avoid prolonged or repeated contact with skin. Contains material which can cause cancer. Risk of cancer depends on duration and level of exposure. Wash thoroughly after handling.
Potential acute health effects:
Eyes: Slightly irritating to the eyes. This product may irritate eyes upon contact.
Skin: Slightly irritating to the skin.
Inhalation: Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.
Ingestion: No known significant effects or critical hazards.

3. Composition/Information on Ingredients

Iron Oxide Red C.A.S # 1309-37-1
Talc C.A.S. # 14807-96-6
Barium Sulfate C.A.S. # 7727-43-7

Pigment Ink

TN-3

Brown Velvet

1

Magnesite C.A.S. # 546-93-0
Crystalline Silica, Quartz C.A.S. # 14808-60-7
Kaolin Clay C.A.S. # 1332-58-7

There are no additional ingredients which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

4. First Aid Measures

Eye Contact:	Remove contact lenses if present. Thoroughly flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.
Skin Contact:	Wash skin with soap and water. Get medical attention if irritation develops.
Inhalation:	Move to fresh air. Get medical attention if irregular breathing occurs.
Ingestion:	Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

5. Fire-Fighting Measures

Products of Combustion:	Decomposition products may include the following materials: Carbon dioxide, carbon monoxide, sulfure oxides, metal oxide(s)
Fire-Fighting media and Instructions:	Use an extinguishing agent for the surrounding fire.
Special protective equipment for fire-fighters:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. Accidental Release Measures

Personal Precautions:	Keep unnecessary personnel away. Provide adequate ventilation. Use suitable protective equipment (section 8).
Environmental Precautions:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for Cleaning Up:	If emergency personnel are unavailable, carefully scoop up spilled materials and use a non-sparking or explosion proof means to transfer to an appropriated container for disposal by incineration. Avoid creating dusty conditions and prevent wind dispersal.

7. Handling and Storage

Handling:	Do not get in eyes or on skin or clothing. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Avoid breathing dust.
Storage:	Keep container tightly closed. Store in a dry, cool and well-ventilated area. Store in accordance with local regulations.

8. Exposure Controls/Personal Protection

Engineering Measures:	If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.	
Environmental Exposure Controls:	Emissions from ventilation or work process equipment should be checked to ensure they comply with requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.	
Personal Protection:	Safety glasses should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates this is necessary.	
Exposure Limits:	Iron Oxide Red	<p>NIOSH REL (United States, 6/2009). TWA: 5 mg/m³, (as Fe) 10 hour(s). Form: Dust and fumes OSHA PEL 1989 (United States, 3/1989). 11. Toxicological Information

Chronic Effects:	Iron Oxide Red	ACGIH = A4	IARC = 3		
	Talc	ACGIH = A1	IARC = 1		
	Crystalline Silica	ACGIH = A2	IARC = 1	NIOSH = +	NTP=PROVEN.
	Kaolin Clay	ACGIH = A4			

Slightly irritating to the eyes and skin. Avoid contact with eyes. Avoid prolonged or repeated contact with skin. Contains material which can cause cancer. Risk of cancer depends on duration and level of exposure. Wash thoroughly after handling.

Mutagenicity/Teratogenicity: No known significant effects or critical hazards.

Reproductive Toxicity: No known significant effects or critical hazards.

12. Ecological Information

Environmental Effects: No known significant effects or hazards.

Aquatic Ecotoxicity:	Barium Sulfate	Result: Acute EC50 32000 ug/L Fresh water Species: Daphnia-water flea-Daphnia magna Exposure: 48 hours
----------------------	----------------	--

13. Disposal Considerations

Waste Disposal:	The generation of waste should be avoided or minimized whenever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

33. Product and Company Identification

Product Name:	Pigment Ink
Product Code:	TN-12
Company:	A Permanent Solution 1038 E. Bastanchury Road #186 Fullerton, CA 92835 USA www.apermanentsolution.com E-mail: info@apermanentsolution.com Phone: (714) 441-1900 Fax: (714) 441-1808

34. Hazards Identification

Physical State:	Solid.
OSHA/HCS Status:	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Emergency Overview:	No specific hazard. MAY CAUSE SKIN AND EYE IRRITATION. Slightly irritating to the eyes and skin. Avoid exposure-obtain special instructions before use. Do not breathe vapor or mist. Avoid contact with eyes. Avoid prolonged or repeated contact with skin. Wash thoroughly after handling.
Potential acute health effects:	
Eyes:	Slightly irritating to the eyes. This product may irritate eyes upon contact.
Skin:	Slightly irritating to the skin.
Inhalation:	Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs.
Ingestion:	No known significant effects or critical hazards.
Other special considerations:	Titanium dioxide has been characterized by IARC as possible carcinogenic to humans (Group 2B) through inhalation (not ingestion). This classification is based upon animal inhalation studies. Epidemiology studies do not suggest as increased risk of cancer in humans from occupational exposure to titanium dioxide.

35. Composition/Information on Ingredients

Titanium Dioxide C.A.S # 13463-67-7

Amorphous Silicia C.A.S. # 7631-86-9

Aluminum Hydroxide C.A.S. # 21645-51-2

There are no additional ingredients which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

36. First Aid Measures

Eye Contact:	Remove contact lenses if present. Thoroughly flush eyes with plenty of water for at least 15 minutes. Get medical attention if irritation occurs.
Skin Contact:	Wash skin with soap and water. Get medical attention if irritation develops.
Inhalation:	Move to fresh air. Get medical attention if irregular breathing occurs.
Ingestion:	Wash out mouth with water. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Get medical attention immediately.

37. Fire-Fighting Measures

Products of combustion:	Decomposition products may include the following materials: metal oxide(s).
Fire-Fighting media and Instructions:	Use an extinguishing agent for the surrounding fire.
Special protective equipment for fire-fighters:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

38. Accidental Release Measures

Personal Precautions:	Keep unnecessary personnel away. Provide adequate ventilation. Use suitable protective equipment (section 8).
Environmental Precautions:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods for Cleaning Up:	If emergency personnel are unavailable, carefully scoop up spilled materials and use a non-sparking or explosion-proof means to transfer material to an appropriate container for disposal by incineration. Avoid creating dusty conditions and prevent wind dispersal.

Pigment Ink

TN-12

39. Handling and Storage

Handling: Do not get in eyes or on skin or clothing. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Avoid breathing dust.

Storage: Keep container tightly closed. Store in a dry, cool and well-ventilated area. Store away from incompatible materials. Store in accordance with local regulations.

40. Exposure Controls/Personal Protection

Engineering Measures: If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory levels.

Particle Size Considerations: titanium dioxide: Fine particles are respirable particles with a primary particle diameter of at least 100 nm. Ultrafine particles are respirable particles with a primary particle diameter of less than 100 nm. The grade of titanium dioxide used as a component in this product is not manufactured to contain ultrafine particles as defined above.

Environmental Exposure Controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Personal Protection:

Eyes: Safety glasses should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

Skin: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

Hands: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Exposure Limits:

Titanium Dioxide	OSHA PEL (United States, 6/2010). TWA: 15 mg/m ³ 8 hour(s). Form: Total dust OSHA PEL 1989 (United States, 3/1989). TWA: 10 mg/m ³ 8 hour(s). Form: Total dust ACGIH TLV (United States, 1/2011). TWA: 10 mg/m ³ 8 hour(s).
Amorphous Silica	NIOSH REL (United States, 6/2009). TWA: 6 mg/m ³ 10 hour(s).
Titanium Dioxide	OSHA PEL 1989 (United States, 3/1989). TWA: 2 mg/m ³ , (as Al) 8 hour(s). NIOSH REL (United States, 6/2009). TWA: 2 mg/m ³ , (as Al) 10 hour(s).

41. Physical and Chemical Properties

Physical State: Solid

Appearance: White Powder
Flash Point: Closed cup: 500°C (932°F)

42. Stability and Reactivity

Stability: The product is stable.
Hazardous Polymerization: Will not occur.
Hazardous Decomposition Products: Under normal conditions of storage and use, hazardous decomposition should not be produced.

43. Toxicological Information

Chronic Effects: Titanium Dioxide ACGIH = A4 IARC = 2B NIOSH = +
Amorphous Silica IARC = 3
Titanium Dioxide has been characterized by IARC as possible carcinogenic to humans (Group 2B) through inhalation (not ingestion). This classification is based upon animal inhalation studies. Epidemiology studies do not suggest an increased risk of cancer in humans from occupational exposure to titanium dioxide. It has not been characterized as a potential carcinogen by either NTP or OSHA. Additionally, the Joint Evaluation Committee on Food Additives (JECFA) has reviewed the safety of titanium dioxide finding no problems for its use in food applications and establishing an acceptable daily intake (ADI) for safe use.

Slightly irritating to the eyes and skin. Avoid exposure-obtain special instructions before use. Do not breathe vapor or mist. Avoid contact with eyes. Avoid prolonged or repeated contact with skin. Wash thoroughly after handling.

Mutagenicity/Teratogenicity: No known significant effects or critical hazards.
Reproductive Toxicity: No known significant effects or critical hazards.

44. Ecological Information

Environmental Effects: No known significant effects or hazards.
Aquatic Ecotoxicity: Slightly toxic to aquatic life.

Pigment Ink TN-12 Whitest White 4

45. Disposal Considerations

Waste Disposal: The generation of waste should be avoided or minimized whenever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal

contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

46. Transport Information

DOT Classification: Refer to the bill of lading for proper shipping information.

47. Regulatory Information

OSHA/HCS Status: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
WHMIS (Canada): Class D-2A: Material causing other toxic effects.
Europe: This product is not classified according to EU legislation.

National Fire Protection Association (USA):

Health: 1
Flammability: 0
Instability: 0

Date of Revision: May 31, 2012

53. Human Health Data

Primary Route(s) of Exposure: Eye Contact, Skin Contact, Inhalation

Human Effects and Symptoms of Overexposure:

Acute: On the basis of Animal toxicity data (see section XII), we would expect this product to be non-irritating to the eyes and skin and essentially non-toxic by ingestion. However, excessive exposure to airborne dust may reduce visibility and/or cause unpleasant deposits in the eyes, ears and nose. Injury to the skin or mucous membranes can occur by direct mechanical action or by rigorous skin cleansing necessary for removal of dust.

Chronic: Not Known.

Other: Prolonged inhalation (6-10 years) of iron oxide fume has been reported to produce changes in lung x-rays of exposed individuals. This condition, siderosis, is considered to be a benign pneumoconiosis that exhibits no adverse health effects. Siderosis has been observed among occupations such as arc-welders where iron oxide fumes are present. To the best of our knowledge, this condition has not been observed after prolonged exposure to iron oxide pigments.

Medical Conditions Aggravated By Exposure: None Known

Carcinogenicity: NTP: Not Listed
IARC: Not Listed
OSHA: Not Listed
Other: IARC and NTP both contain listings for underground hematite mining. These listings are for the occupational exposures associated with the mining process which include radon, a known lung carcinogen. NIOSH in the Registry of Toxic Effects of Chemical Substances (RTECS) lists iron oxide as a suspect human carcinogen. However, the IARC reference to underground hematite mining is the source for this classification. Based on information currently available this product is not considered a carcinogen.

54. Emergency & First Aid Procedures

Eye Contact: Flush eyes with plenty of water, lifting lids periodically for at least 15 minutes. Consult a physician if irritation persists.

Skin Contact: Wash with soap and water.

Inhalation: Remove from dusty area to fresh air. If not breathing give artificial respiration. If breathing is difficult, give oxygen. Call a physician.

Ingestion: Immediately contact a physician.

Pigment Ink

TN-35

Flesh Brown

55. Employee Protection Recommendations

Eye Protection: Safety glasses.

Skin Protection: Rubber, cloth or plastic gloves if appropriate for job conditions.

Respiratory Protection:	Work ambient concentrations should be monitored and if the recommended exposure limit is exceeded, a NIOSH/MSHA approved dust respirator should be worn. Do not exceed use limits of the respirator.
Ventilation:	Use local ventilation to maintain air levels below the recommended exposure limit if dusting is a problem.
Other:	Eye wash stations and washing facilities should be available. Employees should wash their hands and face before eating, drinking or using tobacco products.

56. Reactivity Data

Stability:	This is a stable material.
Polymerization:	Will not occur.
Incompatibilities:	None Known.
Instability Conditions:	None Known.
Decomposition Temperature:	Not Established.
Decomposition Products:	None Known.

57. Spill or Leak Procedures

Steps to be taken in case material is released or spilled: Vacuum or scoop material into an appropriately marked container for reclamation or disposal. Avoid excessive generation of dust. If dust is generated, use appropriate respiratory protection.

Waste disposal method: Material which cannot be recycled into your process should be landfilled in accordance with federal, state and local environmental control regulations.

58. Special Precautions and Storage Data

Storage Temperature (min./max.):	Ambient/Ambient
Average Shelf Life:	Unlimited
Special Sensitivity:	None Known
Handling & Storage:	Store dry at ambient temperature away from food and beverages. Avoid breathing dust. Avoid contact with eyes and skin. Wash thoroughly after handling. Bags on pallets, shrink wrapped in polyethylene: The removal of the polyethylene foil may cause an electrostatic charge; therefore the removal should not be carried out in the vicinity of inflammable vapors.

59. Shipping Information

D.O.T. Shipping Name:	None
Technical Shipping Name:	Inorganic Oxide

D.O.T. Hazard Class:

Non-Regulated

60. Animal Toxicity Data

Acute Toxicity:

Oral LD50: Greater than 500 mg/kg (Rat). (1)

Dermal LD50: Data not established for product.

Inhalation LC50: Data not established for product.

Eye Effects: Non-irritating to rabbit eyes. (1)

Skin Effects: Non-irritating to rabbit skin (24 hrs.) (1)

Sensitization: Data not established for product.

Chronic Toxicity: Data not established for product.

Aquatic Toxicity Data: LCo: Greater than 1000 mg/1 Golden orfe (*Leuciscus idus*). (1)

1 Toxicological tests performed on chemically identical products.

61. Federal Regulatory Information

OSHA Status: This product is non-hazardous under the criteria of the Federal OSHA Hazard Communication Standard 29 CFR 1910.1200.

HMIS Ratings: Health=0 Flammability=0 Reactivity=0

62. Other Information

Issue Date: 12/20/96
